ALEXANDER JAMES HOLYOAKE

Address:		ton OX5 1HD, UK	Email: Tel: GitHub:	ajholyoake@gmail.com +44 (0) 7979752339 ajholyoake	Date of Birth: Nationality:	07/08/1985 British	
Relevant Experience							
2014 - 2016		Race Strategist at Mercedes F1 Team Data Science; Developer; Replace spread- sheets with rigorous inference and automated python system; .NET library development for data structuring; web UI development for easy deployment; rapid, high pressure decision making; .NET Monte Carlo Simulation					
2012 - 2014		Performance Analyst at Caterham F1 Data Science; Lead developer in small group for Python and MATLAB tools with web interfaces for post session analysis					
2007 -	2007 – 2011 Experimental Ph MATLAB, C++, C		a.D. in Applied Mathematics Data analysis; Windows, Bash, C experience to automate data collection; PIV; Reverse enginnering instrumention; Hardware development for data acquisition				
2009 -	2009 – 2011 Form site de portion		mula Student Working with a large team in very high pressure environment; Webdevelopment; Manage and encourage team; Sponsor liaison; Constructed large protion of the car; Custom Software simulation with Bash / python interface to optimion routines				
2005 - 2010		Gentoo Used as main system including all packages compiled from source, kernel maintenance etc (for fun)					
EDUCATION							
2013 - 2015		Various Machine Learning Courses Coursera, Cambridge Coding Academy Workshop, Cranfield Operational Research					
2007 - 2011		Ph.D. in Granular Dynamics Department of Applied Mathematics and Theoretical Physics & Trinity College, University of Cambridge					
2006 - 2007		Masters Degree in Mathematics Trinity College, Cambridge					
2005 - 2007		Certificate and Diploma in Modern Greek Trinity College, Cambridge; Scholarship					
2003 - 2006		First Class B.A. (Hons) in Mathematics Trinity College, Cambridge; Scholarship					
2002 - 2003		for exceptional performance; Heilbronn Prize Sixth Term Examination Papers 2 and 3 (Grade S - outstanding)					
2002 - 2003 $2001 - 2003$		6 A levels and 1 AS level all grade A					
	- 2001	14 GCSEs 11 A* i					
COMMUNICATION							
2014 -	- 2016		_	ad briefing to team owner	rs, drivers and Mer	rcedes board	
2010 - 2016 2011		thoughout race weekend Software Liaison Finding solutions between strategy developers, IT & infrastructure, software group and third party software providers Workplace Coffee Intranet site to centralize coffee ordering and encourage isolated departments to interact					
							2010 -
2008 - 2011		Supervisor for Undergraduate Mathematics Three special commendations for quality of teaching from leader of programme based on student feedback					
2008				hs Mentoring Helped		ts	

TECHNOLOGY

Python Expert, systems programming, machine learning, ex-

tensive data analysis

Matlab + MEX (C Extensions) Expert; data processing, image processing, calibration

routines and non-linear PDE solver (finite volume and

spectral)

HTML, CSS, Javascript Proficient; Experience with express, templating en-

gines, REST interfaces

C / C++ (Linux and Windows) Proficient; data acquisition and time critical Matlab

routines

SQL Proficient; MS-SQL, Postgres, MySQL, SQLLite .NET

Expert; Core track data processing library, implemen-

tations of mathematical algorithms for use in other

components

Beginner; Basic Android development. Computational Java

Fluid Dynamics Post-Processing routines

Go Beginner; Hobby projects to play with concurrency fea-

tures

Office Suite & VBA Proficient BASH Proficient **LATEX** Proficient

Operating systems Excellent knowledge of using and administrating Linux

> systems (Gentoo and Ubuntu) and Windows; also proficient with OSX and cursory knowledge of XCode

PROJECTS

Embedded GPS Logger

github.com/ajholyoake/adaloggergps

Intranet Coffee Store

github.com/ajholyoake/coffee

Online GPS Tracker github.com/ajholyoake/spot_tracker

Graph Theory Animation github.com/ajholyoake/percolator

Home Automation

Embedded C project to log GPS data on an Pi Zero to an SD card to study velocity, acceleration and altitude data for a dirt bike expedition

Node.js, express, html, IIS bootstrap project to centralize coffee ordering and to compile metrics

Python (Flask), Javascript, HTML page to update family and friends of location via a satellite tracker

Javascript, HTML single page for illustrating the con-

cept of percolation in graph theory

Developing software to Raspberry Pi and The Next Chip for lighting and audio and automating home brew-

ing

OTHER SKILLS AND INTERESTS

Physical Hacking Complete renovation and construction of a house; extreme bike mainte-

nance; welding; car maintenance; barbequeue design and manufacture;

growing vegetables

Languages Greek (degree level), German (intermediate), Spanish (intermediate)

Driving Full driving licence (inc. motorcycles)
